Daniel Aguirre

DanielAguirre3141@protonmail.com | linkedin.com/in/dan-aguirre | U.S. Citizen

Education

University of Florida — Gainesville, FL
Bachelor of Science in Computer Science (Cybersecurity) — GPA: 4.0/4.0
Bachelor of Arts in Business Administration — *Expected April 2028*

- **Certifications:** CompTIA Security+, CompTIA Network+, CompTIA A+, Cisco CCST, HTB CPTS (In Progress)
- **Awards:** CPTC 2nd Place Global & 1st Place Southeast Regional, UF Dean's List, Florida Academic Scholarship

Experience

Web Application & Network Penetration Testing Intern — 04/2026 – 08/2026
Aegis IT Solutions — *Fort Lauderdale, FL*

- Conducted black/gray/white-box web app and network pentests for clients across industries, finding OWASP Top 10 and network vulnerabilities (SQLi, XSS, IDOR, SSRF, broken auth) with Burp Suite Pro, Nmap, and custom tooling.
- Authored detailed technical reports translating findings into prioritized remediation roadmaps, delivering clear risk narratives for engineering teams and executive stakeholders alike.
- Performed manual testing beyond automated scanner coverage, including multi-step auth bypass chains, API abuse scenarios, and Auvik-driven network audits (asset discovery, topology mapping, config risk assessment).

Cybersecurity Detection & Response Intern — 08/2025 – 04/2026
University of Florida — *Gainesville, FL*

- Rotated across pentesting, IR, IT audits, and forensics; automated manual workflows with Python/Bash to cut data processing time.
- Served as a SOC Analyst during high-volume periods, running full-cycle incident response on state-level infrastructure and hunting adversarial TTPs with Security Onion and Microsoft Defender EDR.

IT Account Specialist — 08/2024 – 08/2025
University of Florida — *Gainesville, FL*

- Handled identity-based incident response for a 200,000+ user ecosystem, analyzing authentication telemetry (Active Directory/Duo) to remediate compromised accounts and neutralize social engineering attacks.

Independent Security Consultant & Instructor — 01/2020 – Present
Freelance — *Remote*

- Provided security consulting for small business clients, turning technical risks into clear executive summaries that aligned security posture with business goals.
- Designed and delivered customized technical curriculum for CompTIA certifications, breaking down complex concepts (OSI model, PKI) for students with non-technical backgrounds.

Projects

Agentic AI Security Research — 2026 – Present

- Design autonomous Red vs. Blue LLM-agent swarms and reasoning harnesses simulating adversarial AI attack/defense cycles, backed by custom RAG pipelines for real-time tactical context.
- Build sandboxed infrastructure to let opposing agent swarms battle at scale, capturing telemetry to research autonomous AI behavior and develop countermeasures and active defense techniques (e.g., guardrail poisoning).

Collegiate Penetration Testing Competition (CPTC) Captain — 2024 – 2025

- Captain of the 2nd Place Global team, acting as Lead Consultant to manage client relations and deliver a comprehensive final report detailing business risks and compliance violations (NIST, PCI DSS).
- Engineered the team's cloud offensive strategy as Cloud Lead (Azure, AWS, Kubernetes, Docker), developing complex, real-world attack paths to emulate advanced threat actors.

Red Team Volunteer, Collegiate Cyber Defense Competition (CCDC) — 2025 – 2026

- Simulated Advanced Persistent Threats (APTs) against collegiate Blue Teams as part of a 10-person Red Team, evaluating their detection and response capabilities under live fire.
- Ran post-exploitation campaigns on Windows & Linux environments, leveraging C2 frameworks (Cobalt Strike, Sliver) to establish persistence and exfiltrate data.

Multi-Tenant Academic Cyber Range — 2021 – 2024

- Architected a high-availability network backbone for 100+ nodes using OPNsense and UniFi, enforcing a strict Zero Trust posture via 802.1X NAC, granular VLAN segmentation, and Layer 3 ACLs.
- Engineered a fault-tolerant remote access edge with OpenVPN and Shadowsocks for obfuscated tunneling, implementing WAN Load Balancing to ensure resilient connectivity for distributed operations.

Skills

Agentic AI/LLM: Multi-Agent Orchestration, RAG Pipelines, LLM Red-Teaming, Guardrail Security, MCP Security
Programming: Python, C#, Java, C++, Assembly (x86/x64), SQL, Bash, JavaScript, Git
Offensive Security: Cobalt Strike, Sliver, Metasploit, Burp Suite Pro, Nmap, Wireshark, Fuzzing, MITRE ATT&CK
Defensive Security: Defender EDR, Security Onion, Snort/Suricata, Tenable, Auvik, KnowBe4, Threat Hunting
Infrastructure: Azure, AWS, Docker, Kubernetes, Linux, Windows, AD/GPO, OPNsense, UniFi, VLANs, TCP/IP
Compliance: NIST 800-53/CSF, PCI DSS, DISA STIGs, RMF, IT Audits, System Hardening
Spoken Languages: English & Spanish
